window films

Pristine® Clear Nano Ceramic window film is an almost invisible shield that protects you, your home or your building's interior from the sun's damaging heat and harmful ultraviolet rays.

Featuring the finest in multi-layer nano ceramic technology, UltraGard's Pristine® window film provides excellent solar protection and selectively filters heat producing infrared radiation while preserving maximum natural daylight.

The supreme clarity of Pristine® will boost the performance of existing glass without making a visual change to the appearance of your windows. Enjoy uninterrupted two-way viewing through your windows with up to 50% less solar heat and total UV ray protection. Pristine® performs all year round and provides strong fading control that will help prolong the life of your valuable interior furnishings or window display merchandise.

Pristine's metal-free construction is signal friendly and will not compromise your Wi-Fi signal, mobile phone or radio reception. Made with durable ceramics, Pristine® is a fade and corrosion resistant window film perfectly suited for Australia's harsh coastal environment. Designed and built with the highest quality components and adhesives, Pristine can be installed without the need for special edge sealing treatments.

Pristine® window film is fully backed by a comprehensive warranty offering many years of performance and protection.

## FEATURES

- Prestigious spectrally selective construction
- Utilises nano-crystal ceramic technology
- Provides an invisible solar protective shield
- Selectively filters infrared heat and UV light
- Maintains total two-way vision, inside and out
- Optically clear, preserves natural room light
- Perfect solution for store display windows
- Shields high levels of Infrared heat, up to 92%

## BENEFITS

- Helps lower yearly energy costs
- Preserves day and night time views
- Corrosion resistant, ideal for coastal areas
- Warranty does not require edge sealing
- Protects against harmful UV radiation
- Reduces fading of internal furnishings
- Makes glass more shatter resistant
- Scratch resistant and easy to clean

## Pristine® Performance Specifications

PRODUCT CODE	PR70	PR80	PR90
TOTAL SOLAR ENERGY REJECTED %	51	42	30
VISIBLE GLARE REDUCTION %	24	14	6
ULTRAVIOLET PROTECTION %	99	99	99
INFRARED HEAT BLOCK % @ 1025NM	92	81	40

Product performance data based on window film to 3mm (1/8") glass. Values are representative of typical production runs and are subject to normal manufacturing tolerances within industry standards.

## Engineered for Vision, Comfort & Solar Protection

The solar filtering technology of UltraGard Window Films can make a distinct difference in maintaining the look and comfort of your home or building. Whether presenting a uniform appearance from the outside that is architecturally impressive, or helping to preserve the furnishings, product displays and other valuables within, UltraGard's diverse range of window films can provide an economical and energy efficient solution.

Ceramic Comfort Series window films are constructed with the latest in advanced ceramics and optically tuned nano-particle technology. Well known for their durability and thermal insulating properties, ceramic coatings provide a high quality shield for your windows and present a good opportunity to save, from the top to the bottom line.

### Lifetime Residential or 12 Year Commercial Warranty

You're 100% protected Australia wide!

Enjoy absolute peace of mind, knowing that your UltraGard Window Film is guaranteed for as long as you own your home - against peeling, bubbling, cracking, changing colour or loss of performance in any measurable way.
