

Dual tuned technology for optimum benefits.

DUAL REFLECTIVE **Synergy**TM

Synergy is an attractive solution for large expanses of unprotected glass that require superior solar protection. Designed with a high reflective outer coating for maximum solar heat reduction that is dual purpose matched to a non-reflective, ceramic internal layer. This revolutionary ceramic layer reduces annoying glare, minimises unsightly back reflections and makes Synergy the ideal choice for maintaining your scenic views during the day and at night.

Perfectly suited for Australia's harsh coastal climate, Synergy's durable formula is non-corrosive, improves solar performance and provides strong colour stability with extreme fading resistance. Featuring a warm neutral colour tone that preserves and enhances your natural outlook, Synergy also provides daytime privacy without sacrificing room ambience or precious natural daylight.

Available in a wide choice of problem solving density options, the Synergy range provides compatible solutions for dual pane windows and other sensitive glazing systems.

Synergy - dual tuned technology for optimum benefits.
